## **THE FIRST MAZOOON FUND**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018**

#### **1 Legal status and activities**

The First Mazoon Fund (the "FM Fund") is an open-ended fund registered and incorporated in the Sultanate of Oman on 3 May 1997 in accordance with the regulations issued by the Capital Market Authority ("CMA"). The terms and conditions of investment as well as the restrictions are specified in the Investment Prospectus.

According to the FM Fund's investment objectives and strategy as presented in the Investment Prospectus, the FM Fund may invest in equities, related securities such as American Depository Receipts (ADR), Global Depository Receipts (GDR), Exchange Traded Funds (ETF) and in bonds and Sukuks at various exchanges of GCC, US Market, Europe, MENA region and Emerging Asian Economies. GCC will remain a core market for the FM Fund with a minimum investment limit of 80%. The country and stock-wise limits will be decided by the FM funds' Management Body.

The day-to-day operations of the FM Fund are managed by the Investment Manager, Gulf Baader Capital Markets SAOC. The governance and control over the FM Fund is exercised by the FM Fund Management Body, which is responsible for formulating investment strategy and the related guidelines adopted by the FM Fund.

The FM Fund entered into a custodianship agreement with Gulf Custody Company SAOC for all investments owned by the FM Fund in Oman and GCC countries.

The FM Fund's net asset value (and net asset value per unit) is determined on daily basis and the financial statements are prepared on the basis of last valuation day of the period.

#### **2 Summary of significant accounting policies**

The principal accounting policies applied in the preparation of the financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

##### **Statement of compliance**

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and include the disclosure requirements set out in the relevant provisions of the Executive Regulations issued by the Capital Market Authority of the Sultanate of Oman.

##### **Basis of preparation**

The financial statements are prepared on the historical cost basis, as modified to include the fair value of certain financial assets and liabilities.

##### **Functional and presentation currency**

The financial statements have been presented in Rial Omani ("RO"), which is the functional and presentation currency of the FM Fund.

## **THE FIRST MAZOOON FUND**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)**

#### **2 Summary of significant accounting policies (continued)**

##### **Standards, amendments and interpretations to existing IFRS effective 1 January 2017**

For the period ended 31 March 2018, the FM Fund has adopted all applicable new and revised standards and interpretations issued by the IASB that are relevant to its operations and effective for accounting period beginning on 1 January 2018 that have no material effect on the financial statements of the FM Fund.

Amendments to IAS 7, 'Statement of Cash Flows' became effective for annual periods beginning on or after 1 January 2017. These amendments require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Adoption of these amendments did not have a material impact on FM Fund's financial statements.

##### **Standards, amendments and interpretations to existing IFRS that are not yet effective**

Certain new standards, amendments and interpretations to existing standards have been published that are not effective and mandatory for the FM Fund's accounting period beginning on 1 January 2018 which the management has decided to adopt from the applicable periods.

IFRS 9 'Financial Instruments' addresses the classification, measurement and derecognition of financial assets and liabilities. It replaces the multiple classification and measurement models in IAS 39 and is effective for reporting periods beginning on or after 1 January 2018.

Classification and measurement of debt assets will be driven by the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets.

Equity and derivative instruments are measured at fair value through profit or loss unless, for equity instruments not held for trading, an irrevocable option is taken to measure at fair value through other comprehensive income.

A debt instrument is measured at amortised cost if the objective of the business model is to hold the financial asset for the collection of the contractual cash flows and the contractual cash flows under the instrument solely represent payments of principal and interest (SPPI). A debt instrument is measured at fair value through other comprehensive income if the objective of the business model is to hold the financial asset both to collect contractual cash flows from SPPI and to sell. All other debt instruments must be recognised at fair value through profit or loss. An entity may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

IFRS 9 also introduces a new expected credit loss (ECL) impairment model.

In addition to the above, a number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2018, and have not been applied in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the FM Fund.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 2 Summary of Significant accounting policies (continued)

##### **Income**

Income comprises of dividend, interest income and other income. Dividend income is recognised when the right to receive payment is established. Interest income is recognised in profit or loss using effective interest method.

##### **Financial assets and liabilities**

###### *Classification*

The FM Fund classifies its financial assets and financial liabilities into the following categories:

Financial assets at fair value through profit or loss (FVPL):

- Held for trading: marketable securities which are financial assets at fair value through profit or loss

Financial assets at amortised cost:

- Loans and receivables: cash and cash equivalents, balances due from brokers and other receivables.

Financial liabilities at amortised cost:

- Balances due to related parties and other payables.

A financial instrument is classified as held for trading if:

- i) it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term;
- ii) on initial recognition, it is part of a portfolio that is managed together and for which there is evidence of a recent pattern of short-term profit taking; or
- iii) it is a derivative, other than a designated and effective hedging instrument.

The FM Fund designates all marketable securities at FVPL on initial recognition because it manages these marketable securities on a fair value basis in accordance with its documented investment strategy. Internal reporting and performance measurement of these marketable equity securities are on a fair value basis.

A financial asset with fixed or determinable payments may be classified as a loan and receivable unless it is quoted in an active market or is an asset for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

###### *Recognition, initial measurement and subsequent measurement*

- (i) Financial assets at fair value through profit or loss

Financial assets and financial liabilities at fair value through profit or loss (FVPL) are initially recognised on the trade date, which is the date on which the FM Fund becomes a party to the contractual provisions of the instrument. Other financial assets and financial liabilities are recognised on the date on which they are originated.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 2 Summary of significant accounting policies (continued)

##### Financial assets and liabilities (continued)

###### *Recognition, initial measurement and subsequent measurement (continued)*

Financial assets and financial liabilities at FVPL are initially recognised at fair value, with transaction costs recognised in profit or loss. Financial assets or financial liabilities not at FVPL are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition or issue.

Subsequent to initial recognition, financial assets representing marketable securities are carried at fair value.

Gains and losses arising from changes in the fair value of the financial assets at fair value through profit or loss category are included in the profit or loss in the period in which they arise.

##### (ii) Loans and receivables

A financial asset with fixed or determinable payments may be classified as a loan and receivable and are realisable within twelve months from the reporting date. Loans and receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market and arise during the ordinary course of the business. The FM Fund's loans and receivables comprise of other receivables. Other receivables are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition or origination. They are subsequently measured at amortised cost using the effective interest method, less provision for impairment (if any).

###### *Fair value measurement*

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the FM Fund has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the FM Fund measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as 'active' if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The FM Fund measures instruments quoted in an active market at a market closing price.

The fair value of financial assets through profit and loss is based on their quoted market prices at the reporting date.

###### *Derecognition*

Financial assets are derecognised when the rights to receive cash flows from the financial instruments have expired or the FM Fund has transferred substantially all risks and rewards of ownership.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of financial asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in profit or loss.

The FM Fund derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

## **THE FIRST MAZOOON FUND**

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### **2 Summary of Significant accounting policies (continued)**

##### **Financial assets and liabilities (continued)**

*Recognition, initial measurement and subsequent measurement (continued)*

##### *Offsetting*

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the FM Fund has a legal right to offset the amounts and it intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

Gains and losses from change in fair value of financial assets at FVPL are presented on a net basis while foreign exchange gains and losses of such financial instruments at FVPL are included in such net gain or loss.

##### **Cash and cash equivalents**

Cash and cash equivalents comprise cash in hand and demand deposits, together with other short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents includes investments with short maturity of three months or less from the date of acquisition and cash or balances held with brokers.

##### **Taxation**

The FM Fund is domiciled in the Sultanate of Oman. Under the current tax laws of the Sultanate of Oman, there is no income, capital gain or other taxes payable by the FM Fund.

##### **Redeemable participating units**

Redeemable participating units are classified as financial liabilities and are measured at the present value of the redemption amount.

The FM Fund issues units which are redeemable at the unitholders' option. Redeemable participating units can be put back to the FM Fund at dealing date for cash equal to a proportionate share of the FM Fund's Net Asset(s) Value. These redeemable participating units are carried at the redemption amount that is payable at the end of the reporting period if the unitholder exercises the right to put the unit back to the FM Fund.

Redeemable participating units are issued and redeemed at the holder's option at prices based on the FM Fund's Net Asset (s) Value per unit at the time of issue or redemption. The FM Fund's Net Asset(s) Value per unit is computed by dividing the net assets attributable to the holders of the redeemable participating units with the total number of outstanding redeemable participating units. In accordance with the FM Fund's Investment Prospectus, investment positions are valued based on the market closing price (fair value) for the purpose of determining the Net Asset(s) Value per unit for subscriptions and redemptions.

##### **Distributions payable to the holders of the redeemable participating units**

Proposed distributions to holders of redeemable participating units are recognised in statement of net assets attributable to unitholders, when they are approved at the Management Body meeting.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 2 Summary of Significant accounting policies (continued)

##### Foreign currency transactions

Transactions denominated in foreign currencies are translated into Rial Omani at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are translated into Rial Omani at exchange rates prevailing at the end of the reporting period. Differences on foreign currency exchange are dealt with in profit or loss.

Foreign currency exchange differences arising on retranslation are recognised in profit or loss as net foreign currency exchange losses, except for those arising on financial assets at FVPL, which are recognised as a component of net gain or loss from financial instruments at FVPL.

##### Estimates and judgments

In preparing the financial statements, management has made judgments, estimates and assumptions which affect the application of accounting policies and the reported income and expenses, assets, liabilities and related disclosures. Actual results in future could differ from such estimates.

The use of available information and application of judgment based on historical experience and other factors are inherent in the formation of estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Information about judgments made in applying accounting policies that have most significant effect on the amounts recognized in the financial statements is classification of financial assets.

Information about assumptions and estimation uncertainties that have significant risk of resulting in a material adjustment relates to the determination of the fair value (refer note 16).

#### 3 Financial assets at fair value through profit or loss

#### 9 Related party transactions

During the period, the FM Fund entered into transactions in the ordinary course of business with certain related parties. Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. These transactions are entered into on terms which the Management Body considers correspond to those that could be obtained through normal arm's length transactions with third parties.

- (a) Significant related party transactions which the FM Fund entered into during the period as per the terms prescribed in the FM Fund's Investment Prospectus:

	<b>31-03-2018</b>	31-03-2017
	<b>RO</b>	RO
Management fees (note 6)	<b>28,577</b>	27,208
Dividend payout	-	152,107

- (b) The Management Body fees for the period amount to RO 9,397 (31-03-2017: RO 9,397).

- (c) The related party balances outstanding at the reporting date, arising from related party transactions, are as follows:

	<b>31-03-2018</b>	31-03-2017
	<b>RO</b>	RO
Management fees	<b>28,577</b>	27,208
Management Body fees	<b>7,397</b>	7,397
	<b>35,974</b>	34,605

- (d) During the period, related parties redeemed nil units (31-03-2017: 13,907). Related parties subscribe nil units (31-03-2017: Nil) during the period.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 9 Related party transactions (continued)

- (e) In addition to the above, the FM Fund purchases and sells investments traded on the MSM through a related party broker. Brokerage on these transactions is paid at the rates prescribed by the market authorities. The FM Fund's purchase and sale transactions of investments is as follows:

	<b>31-03-2018</b>	31-03-2017
	<b>RO</b>	RO
Purchase of financial assets at fair value through profit or loss	<b>404,157</b>	-
Sale of financial assets at fair value through profit or loss	<b>348,187</b>	-
Brokerage commission	<b>2,633</b>	-

#### 10 Taxation

In accordance with Article 117 of the Income Tax Law income accruing to an investment fund set up in Oman, under the Capital Market Authority Law, is exempt from tax.

#### 11 Redeemable participating units

- (a) All issued redeemable units are fully paid. The FM Fund's variable capital is represented by these redeemable units with no par value and with each carrying one vote. They are entitled to dividends and to payment of proportionate units based on the FM Fund's Net Asset Value per unit on the redemption date.
- (b) To determine the Net Asset Value of the FM Fund for subscriptions and redemptions, marketable securities have been valued based on the market closing price on the relevant trading day. At the reporting date, the FM Fund's Net Asset Value per redeemable participating unit is RO 0.998 (2016: RO 1.097).
- (c) The number of redeemable participating units as at 31 March 2018 comprise 7,904,932 (31-03-2017: 7,253,608) fully paid units. The units are issued and redeemed at prices based on the prevailing Net Asset Value of the FM Fund, subject to conditions specified in the Investment Prospectus.
- (d) The details of unitholders who own 10% or more of the FM Fund's units are as follows:

	<b>31-03-2018</b>	31-03-2017
	<b>Units</b>	Units
Gulf Investment Services Company SAOG	<b>3,042,135</b>	3,042,135

		-

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 12 Net asset value per unit

Net assets attributable to a holder of the redeemable participating units represent a liability in the statement of financial position, carried at the Net Assets Value that would be payable at the reporting date if the holder exercised the right to put the units back to the FM Fund as computed in accordance with the FM Fund's Investment Prospectus.

In accordance with the Capital Market Authority requirements and the FM Fund's Investment Prospectus, net assets attributable to the unitholders per unit has been derived by dividing the net assets by the number of units in issue at the reporting date.

	<b>31-03-2018</b>	31-03-2017
Net assets attributable to the unitholders (RO)	<b>8,605,808</b>	7,431,036
Number of outstanding units at the period end	<b>7,904,932</b>	7,253,608
Net asset value per unit (RO)	<b>1.089</b>	1.024

#### 13 (Loss)/profit per unit

(Loss)/profit per unit is calculated by dividing the (loss)/profit for the period by the weighted average number of units outstanding during the period as follows:

	<b>31-03-2018</b>	31-03-2017
(Decrease)/increase in net assets attributable to the unitholders (RO)	<b>713,619</b>	(162,523)
Weighted average number of units outstanding during the period	<b>7,907,101</b>	7,238,288
(Loss)/profit per unit (RO)	<b>0.090</b>	(0.022)

#### 14 Distributions to the unitholders

During the period nil (31-03-2017 the fund has distributed a cash dividend of RO 0.050 per unit for the year ended 31 December 2016 was approved at the FM Fund's Annual General Meeting held with a record date of

#### 15 Financial risk management

The FM Fund's activities expose it to a variety of financial risks. The FM Fund's objective of risk management policy seeks to maximize the returns derived for the risk levels to which the FM Fund is exposed and seeks to minimize potential adverse effects on the FM Fund's financial performance.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 15 Financial risk management (continued)

Management Body of the FM Fund is responsible for the overall risk management and has delegated the responsibility to the Investment Manager. Risk management is carried out by the Investment Manager under policies approved by the Management Body. The FM Fund's Investment Prospectus and Investment Management Agreement detail its investment policy and broad level guidelines that encompasses its overall investment strategy, its tolerance for risk and its general risk management approach.

These risk levels are measured and monitored on a continuous basis and compliance with the prescribed risk levels are reported by the Investment Manager to the Management Body on a quarterly basis. All investments present a risk of loss of capital. The maximum loss of capital on such (exchange traded) marketable securities is limited to the fair value of those positions.

The FM Fund's risks are monitored on a quarterly basis by Fund Management Body. Where such risks are not in accordance with the investment policy or guidelines of the FM Fund, the Investment Manager is obliged to rebalance the portfolio.

Financial instruments of the FM Fund are bank balances, investments in marketable securities at fair value through profit or loss and other payables. The FM Fund's activities expose it to a variety of financial and other risks from financial instruments, such as:

- (a) market risks (including interest rate risk, foreign currency risk and price risk);
- (b) credit risk; and
- (c) liquidity risk.

#### (a) Market risk

'Market risk' is the risk that changes in market prices such as interest rates, foreign exchange rates and equity prices will affect the FM Fund's income or the fair value of its holdings of financial instruments.

S&P GCC Index is the benchmark against which performance of the FM Fund is measured. The FM Fund does not use derivatives to manage its exposure to foreign currency, interest rate and price risks.

#### *Price risk*

'Price risk' is the risk that fair value of the financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment or its issuer or factors affecting all instruments traded in the market.

The FM Fund trades in (exchange-traded) marketable securities which are susceptible to market price risk arising from uncertainties about future prices of those marketable securities. The FM Fund's market price risk is managed through the daily monitoring of the FM Fund's overall market positions by the Investment Manager. The overall market position, trend and risk levels per category are reviewed by the Management Body on an ongoing basis.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 15 Financial risk management (continued)

##### (a) Market risk (continued)

###### *Price risk (continued)*

According to the FM Fund's investment objectives and strategy as presented in the Investment Prospectus, the FM Fund may invest in equities, related securities such as American Depository Receipts(ADR), Global Depository Receipts (GDR), Exchange Traded Funds (ETF) and in bonds and Sukuks at various exchanges of GCC, MENA region and Emerging Asian Economies. GCC will remain a core market for the FM Fund with a minimum investment limit of 80%. The country and stock-wise limits will be decided by the FM funds' Management Body.

The Investment Manager complies with investment restrictions which are set out in the Investment Prospectus and CMA regulations which limit the exposure of the FM Fund to adverse changes in the price of any individual financial asset.

Summarised sector-wise financial assets at fair value through profit or loss is presented below:

Sector (Local)	31-03-2018		31-03-2017	
	Fair value RO	% of net assets value	Fair value RO	% of net assets value
Banking and Investment Services	178,392	2.07%	228,920	3.08%
	86,618	1.01%	13,690	0.18%
<b>Sector (Foreign)</b>				
Banking	1,929,294	22.42%	2,198,665	29.59%
Services	3,469,307	40.31%	3,215,407	43.27%
Industrial	1,864,442	21.66%	1,143,096	15.38%
	<u>7,528,053</u>	<u>87.48%</u>	<u>6,799,778</u>	<u>91.51%</u>

The FM Fund is benchmarked against S&P GCC Index for its local and GCC portfolio of securities. The annualized volatility of the Fund is 12.80% (2016: 13.30%) as compared with 15.90% (2016: 16.10%) of S&P GCC Index. A change by 1% in the S&P GCC Index will result in change of net asset value of the Fund by 0.76% (2016: 0.78%). These stated techniques provide a yardstick to the Investment Manager to analyze the sensitivity of the Fund's investments and returns.

###### *Interest rate risk*

'Interest rate risk' is the risk that the fair value or future cash flows of financial instruments will fluctuate as a result of changes in market interest rates. As at 31 March 2018, 100% of net assets (31-03-2017: 100%) of the FM Fund's financial assets and liabilities are non-interest bearing. Hence, the FM Fund is not subject to significant amount of risk due to fluctuations in the prevailing levels of market interest rates.

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 15 Financial risk management (continued)

##### (a) Market risk (continued)

###### *Foreign currency risk*

'Foreign currency risk' is the risk that the fair value or future cash flows of financial instruments will fluctuate as a result of changes in underlying foreign currency rates.

The FM Fund invests in financial instruments and enters into transactions that are denominated in currencies other than its functional currency, primarily in Saudi Riyal, UAE Dirham, Qatari Riyal and Kuwaiti Dinar. Consequently, The FM Fund is exposed to risk that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the fair value or future cash flows of the FM Fund's financial assets or financial liabilities denominated in currencies other than the Rial Omani.

FM Fund's financial assets in foreign currencies at the reporting date are:

	31-03-2018		31-03-2017	
	Foreign Currency	RO	Foreign Currency	RO
<i>Marketable securities at fair value through profit or loss</i>				
Saudi Riyal	49,943,569	5,094,244	34,325,735	3,501,225
UAE Dirham	8,545,470	890,438	11,828,800	1,235,687
Qatari Riyal	7,516,214	774,170	14,537,521	1,524,986
Kuwaiti Dinaar	399,517	504,191	232,947	290,265
<i>Cash and cash equivalents</i>				
Saudi Riyal	5,392,692	550,055	476,443	48,589
UAE Dirham	1,749,047	182,251	6,413,286	668,264
Qatari Riyal	336,572	34,667	608,329	63,814
Kuwaiti Dinaar	78,457	99,013	91,858	114,455

The FM fund's financial assets exposure to foreign currency risk at the reporting date is:

<i>Region of denominated currency</i>	31-03-2018	% of net	31-03-2017	% of net
	RO	assets value	RO	assets value
GCC (excluding Oman)	7,263,043	84.40%	6,552,163	88.17%

The table below indicates the sensitivity of marketable securities denominated in foreign currency of FM Fund (as impacted by changes in the financial instruments' fair value) to the expected changes in the foreign currency exchange rates at the end of the reporting period with all other variables held constant.

A change of 0.5% increase or decrease in foreign currency exchange rates would have decreased or increased respectively net assets attributable to unitholders by the following amounts:

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 15 Financial risk management (continued)

##### (a) Market risk (continued)

###### Foreign currency risk (continued)

	31-03-2018 RO	% of net assets	31-03-2017 RO	% of net assets
<i>Marketable securities at fair value through profit or loss</i>				
GCC- Kuwait	2,521	0.029%	1,470	0.020%
<i>Cash and cash equivalents</i>				
GCC- Kuwait	495	0.006%	580	0.008%

##### (b) Credit risk

'Credit risk' is the risk that a counterparty (such as an issuer, custodian, broker or bank) to a financial instrument will fail to discharge an obligation or commitment, resulting in a financial loss to the FM Fund. For risk management reporting purposes the Investment Manager considers and consolidates all elements of credit risk exposure (such as individual obligor default risk, country and sector risk).

The FM Fund principally invests in (exchange-traded) marketable securities and is not directly exposed to significant credit risk except cash and cash equivalents.

The FM Fund limits its credit risk with regard to cash and cash equivalents by dealing with reputable banks with good credit ratings. The table below shows the balances with brokers and bank balances with the counterparties analysed by credit rating based on Moody's global ratings.

At 31 December, the FM Fund had bank balances with the following credit quality:

Balance with	Credit Rating	31-03-2018 RO	% of net assets	2016 RO	% of net assets
Bank Muscat	Baa2	72,601	0.84%	951,381	12.80%
Burgan Bank	A3	99,013	1.15%	41,023	0.55%
Commercial Bank of Qatar	A2	12,127	0.14%	7,978	0.11%
First Abudhabi Bank	Aa3	3,096	0.04%	11,169	0.15%
Balances with brokers	Unrated	804,127	9.34%	757,857	10.20%
		<u>990,964</u>	<u>11.52%</u>	<u>1,769,408</u>	<u>23.81%</u>

Balances due from brokers result from sale transactions awaiting settlement. Credit risk relating to unsettled transactions deemed to be low due to the short settlement period involved (as the amount is collected within three days after the transactions in line with the market norms) and the high credit quality of the broker used. As at the reporting date approximately 90% (31-03-2017: approximately 94%) of the balance due from brokers is concentrated with averagely 2 brokers (31-03-2017: 2 brokers).

There is no significant concentration of credit risk in cash and cash equivalents at 31-03-2018. (31-03-2017: No significant concentration).

## THE FIRST MAZOOON FUND

### NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)

#### 15 Financial risk management (continued)

##### (c) Liquidity risk

'Liquidity risk' is the risk that the FM Fund will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The FM Fund has a contractual obligation to redeem units to unitholders within 3 days. Historical experience indicates that these units are held by the unitholders on a medium or long-term basis. Based on Management's estimate, maximum redemption levels are expected to be insignificant during a financial period.

The FM Fund's investments in (exchange-traded) marketable equity securities are considered to be readily realisable because they are traded on Muscat Securities Market (MSM) and the GCC Securities Markets and represents approximately 87% of net assets of FM Fund (31-03-2017: approximately 91%).

To reduce the liquidity risk, the FM Fund has made investments only in those (exchange traded) marketable securities which are actively traded on the security markets. Investments in marketable securities at fair value through profit or loss are representing approximately 87% (31-03-2017: approximately 91%) of total net assets value and approximately 87% (31-03-2017: approximately 78%) of (total) assets of the FM Fund and are traded in active securities trading market and can be readily realized into cash within 3 days or less. At 31-03-2018, the FM Fund's holding in cash and cash equivalents represented approximately 12% (31-03-2017: approximately 24%) of its net assets. Accordingly, the FM Fund is not subject to significant liquidity risk.

The FM Fund's all financial liabilities except net assets attributable to the unitholders at the reporting date fall within three months from the end of the reporting period.

#### 16 Fair value of financial instruments

Fair value of financial assets that are traded in active markets that the FM Fund can access at the measurement date are obtained directly from an exchange on which the instruments are traded. For all other financial instruments, the FM Fund may determine fair values using other valuation techniques, if any.

For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

The FM Fund measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.

Level 2: Inputs other than quoted market prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted market prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

**THE FIRST MAZOOON FUND**NOTES TO THE FINANCIAL STATEMENTS  
FOR THE PERIOD ENDED 31 MARCH 2018 (continued)**16 Fair value of financial instruments** (continued)

Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted market prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The FM Fund held no Level 2 or Level 3 financial assets during the period ended 31 March 2018 (31 March 31-03-2017: Nil).

*Last valuation day*

The last trading day of the securities markets where the FM Fund's marketable securities are listed was: Oman and GCC: Thursday, 29 March 2018 (2017: Thursday, 30 March 2017).

**17 Capital risk management**

The FM Fund is an investment fund with a variable capital divided into units of no par value. FM Fund does not have maximum capital and its units are not capital guaranteed.

The capital of the FM Fund is represented by the net assets attributable to holders of redeemable units. The amount of net assets attributable to holders of redeemable units can change on a daily basis, as the FM Fund is subject to daily subscriptions and redemptions at the discretion of unitholders. The FM Fund's objective when managing capital is to safeguard the FM Fund's ability to continue as a going concern in order to provide returns for unitholders, provide benefits for other stakeholders and maintain a strong capital base to support the development of investment activities of the FM Fund.

In order to maintain or adjust the capital structure, the FM Fund's policy is to monitor the level of subscriptions and redemptions relative to the net assets and adjust the amount of distributions the FM Fund pays to redeemable unitholders.

The FM Fund's Management Body and the managing company monitor capital on the basis of the value of net assets attributable to holders of redeemable units. The FM Fund is not subject to externally imposed capital requirement.

Net Asset Value at the end of the period	<b>1.089</b>	1.024
Brokerage commissions and markups	<b>0.002</b>	0.001

#### 21 Ratios

Net Asset Value is calculated by dividing the net assets by the number of outstanding units at reporting date. Total Return, Growth of an Assumed Investment and Simple Return are based on the dividends paid to the unitholders, and the growth in the Net Asset Value during the period. These ratios are based on, or affected by, the price at which the units were purchased in the market, or the price for which units may be sold in the market.

	31-03-2018	31-03-2017
	%	%
Simple return (not annualised): [(Loss)/profit to opening Net Asset Value]	<b>9.03%</b>	(2.01)%
Expense ratio (annualised): (Expenses to average Net Asset Value)	<b>0.56%</b>	0.57%
Brokerage expense ratio (annualised): (Brokerage expense to average Net Asset Value)	<b>0.47%</b>	0.29%
Portfolio turnover rate (annualised): (Securities traded to average Net Asset Value)	<b>204.43%</b>	125.00%
Liability ratio: (Liabilities to Net Asset Value)	<b>0.46%</b>	16.06%

## **THE FIRST MAZOOON FUND**

### **NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31 MARCH 2018 (continued)**

#### **22 Definition of ratios**

##### **Simple return**

Calculated by dividing the per unit after tax profit for the period, by the per unit NAV at the beginning of the year. Or, calculated by dividing the sum of per unit dividends and change in the net asset value during the year, by the per unit NAV at the beginning of the year.

##### **Expense ratio**

Expenses during the period (interest expenses + all Management and other expenses excluding brokerage commissions), divided by average NAV amount  $[(\text{opening NAV} + \text{closing NAV}) \div 2]$  for the period.

##### **Brokerage expense ratio**

Brokerage commissions during the period divided by average NAV amount for the period.

##### **Portfolio turnover rate**

Average of the price of assets bought and the price of the assets sold  $[(\text{purchases} + \text{sales}) \div 2]$ , during the period, divided by average NAV amount for the period.

##### **Liability ratio**

Liabilities at the end of the period, divided by the NAV amount at the end of the period.
